SUMMARY

Computer Science graduate with practical experience through projects in Python, SQL, Pandas, NumPy, Scikit-learn, Power BI, and Machine Learning. Built data and AI solutions including a movie recommendation engine covering 7,200+ movies, a data risk assessment tool, and a hybrid AI assistant integrating Gemini and local LLMs. Seeking entry-level roles in Data Analytics, Data Science, or AI/ML.

EXPERIENCE

QSpiders Gurugram

Aug. 2025 – Aug. 2026

Data Analytics Trainee

Gurugram, India

- Completed hands-on training in SQL, Advanced Excel, and Power BI, covering data extraction, cleaning, analysis, and dashboard reporting.
- Performed exploratory data analysis on 5+ real-world datasets using Pandas, NumPy, and Matplotlib to identify trends, outliers, and correlations.
- Developed SQL queries using joins, aggregations, and subqueries to retrieve and transform data across relational tables for reporting.

PROJECTS

Nova AI | Python, Flask, Ollama, Gemini API, OpenRouter | [GitHub](#)

December 2025

- Built a hybrid AI assistant routing queries between local LLMs (Ollama) and cloud APIs (Gemini, OpenRouter) based on task complexity.
- Integrated real-time web retrieval (RAG) to ground responses in live search context and improve response reliability.
- Delivered a Flask web interface with asynchronous streaming responses and session memory retention.

NovaFlix | Python, Pandas, Scikit-learn, SQL, FastAPI | [GitHub](#) | [Live](#)

March 2026

- Built a content-based movie recommendation engine covering 7,200+ movies and 300+ anime titles using TF-IDF vectorization and cosine similarity across genres, cast, and crew.
- Delivered personalized recommendations in under 3 seconds via a FastAPI backend paired with a React/Vite frontend integrating live TMDB API data.
- Deployed the application with the React/Vite frontend on Vercel and FastAPI backend on Render, with mood-based filtering, user profiles, and watchlist tracking.

NovaReality | Python, Pandas, NumPy, Streamlit, FastAPI | [GitHub](#) | [Live](#)

May 2026

- Built a data risk assessment tool that scans datasets for bias, leakage, and low signal-to-noise ratios before model training.
- Designed a synthetic data generator producing 100+ correlated features across churn and real-estate datasets to stress-test analytical models.
- Built an interactive Streamlit dashboard visualizing data quality metrics, drift indicators, and feasibility scores.

SKILLS

Programming & Data : Python, SQL, Pandas, NumPy, Matplotlib, Scikit-learn

Analytics & BI : MS Excel (Advanced), Power BI

AI/ML & Frameworks : Machine Learning, FastAPI, Flask, Streamlit, Ollama, Gemini API, OpenRouter

Tools & Deployment : Git, Jupyter Notebook, VS Code, Vercel, Render

CERTIFICATIONS

Cisco Networking Academy: Data Analytics Essentials, Introduction to Data Science

Jan. – Feb. 2026

NPTEL (IITM): Artificial Intelligence – Concepts & Techniques, Introduction to IoT

Jul. – Aug. 2025

EDUCATION

Mewat Engineering College, Nuh

Aug. 2022 – May 2026

Bachelor of Technology in Computer Science and Engineering, CGPA: 7.59

Nuh, Haryana

- *Affiliated to*: Gurugram University
- *Relevant Coursework*: Data Structures, DBMS, Linear Algebra, Probability & Statistics, Machine Learning
